

Reddit r/nyu - Awful Quality of Education at Tandon

Source: https://www.reddit.com/r/nyu/comments/1g1ypkm/awful_quality_of_education_at_tandon/

Original Post

The courses at Tandon have been disappointing. The quality of instruction is lacking, the course content feels poorly structured, and the overall design of the classes doesn't reflect the tuition fee of \$31,000 per semester. As a Computer Engineering sophomore at Tandon, I'm finding most of my classes to be frustratingly subpar. It's making me question whether I want to continue my studies here at NYU. Some of my professors seem disengaged, as if they don't care about the classes they're teaching. The grading feels unfair, and when I try to address these concerns, I often receive no response or a dismissive reply. I was at ASU before transferring to NYU and I think the quality of education was much, much better there.
