

Reddit r/nyu - Worries About Tandon

Source: https://www.reddit.com/r/nyu/comments/g6xa4t/worries_about_tandon/

Original Post

I'll be attending Tandon in the Fall and while I feel comfortable with my major, I feel uncertain about Tandon in general. My worries are: (1) The quality of professors will be mediocre - I'm worried they won't care or can't teach well. (2) The quality of the material and curriculum will be mediocre - I feel students learning math or science at CAS will be given a deeper understanding than at Tandon. (3) The likelihood of getting an internship at an amazing company (Google, SpaceX, Apple, etc.) will be very low. (4) People think Tandon is mediocre and that will hinder me getting a job. After going through old Reddit posts I read bad things that worry me. I'm hoping someone can refute some or all of these.
